Plantation of foreign trees

†2138. SHRI JANESHWAR MISHRA: Will the Minister of ENVIRONMENT AND FORESTS be pleased to state:

(a) whether it is a fact that a large number of foreign trees, like eucalyptus have been planted throughout India during the last 15 years;

(b) whether it is also a fact that a large scale ground water depletion has taken place due to these trees;

(c) whether it is also a fact that even today only thorny, non-shady and non-fruit bearing trees are planted on the road-sides, in parks and near railway lines; and

(d) the action Government are taking to plant fruit bearing trees like eugenea, neem, mangoes etc. after getting the abovesaid trees destroyed?

†Original notice of the question was received in Hindi.

THE MINISTER OF STATE IN THE MINISTRY OF ENVIRONMENT AND FORESTS (SHRI DILIP SINGH JUDEV): (a) Yes, Sir.

(b) No, Sir. Most of the species introduced in the past belonged to the various genera of Acacia, tropical pines, Leucaena and Eucalyptus. These species do not deplete ground water. There is evidence that Eucalyptus actually uses less water per unit of biomass produced as compared to other tree species.

(c) All kinds of species are being planted on road sides, parks and near railway lines depending upon the site conditions.

(d) Planting of trees is done in different states based on the site requirements and there is no scheme in the Ministry for destroying the foreign planted trees and replacing them with fruit bearing trees.
